

REMARKS

In an Office Communication mailed August 17, 2004, Applicants were requested to correct an inconsistency between the drawings and Brief Description of the Drawings. This application has been assigned from Motorola, Inc. to Freescale Semiconductor, Inc. effective April 4, 2004.

In response, Applicants are herein submitting replacement sheets 1/3, 2/3 and 3/3 of the originally filed drawings which were approved by the Examiner in a Communication mailed April 23, 2003, a copy of which is herein enclosed. No amendment to the drawings have been made.

Applicants are herein amending the Brief Description of the Drawings to more accurately reflect all illustrated views of FIG. 5 and FIG. 6. Entrance of this informal amendment fully complies with the Notice of Drawing Inconsistency.

Applicants also point out that in the Notice mailed on August 17, 2004, the Notice stated that drawings were filed on April 23, 2003 and the existence of a FIG. 7. An Office Communication was mailed to Applicants on April 23, 2003. Applicants did not submit formal drawings on April 23, 2003. Also, there has never been a Figure 7 in the instant application. A prior art patent contained in the PTO Office Communication of April 23, 2003 however contained a Figure 7. A copy of the first two pages of the April 23, 2003 PTO Office Communication is herein attached.

Applicants respectfully request withdrawal of the notice of drawing inconsistency, thereby placing the application in condition for publication. Should issues remain that might be
